If you bought a product license from Microsoft, you'll need to validate it by sending the product key via fax, email, or another method. Nov 11, 2010 Microsoft releases Windows 7 Activation Key for OEM (PDF). Oct 10, 2010 Your product key information can be found on a sticker on the back of the product that is inside the box. If your product key is entered incorrectly, or if you purchased it from a reseller other than Microsoft (including retailers), Microsoft will need to validate your purchase using the following information: How to find your product key information: - The product sticker should be visible. - You can access the product sticker by opening the window with the product or removing the CD-ROM from the CD-ROM drive. - If you cannot access the product sticker, you can access the product key by opening the case and opening a back panel (if available). If your product key was purchased from a reseller other than Microsoft (including retailers), you will also need to provide these details: - The product key purchase information, including the brand, model, and serial number of the product, and the name and address of the retailer you purchased the product from. - The name and address of the reseller from which you purchased the product. Sep 25, 2010 Check with your OEM or reseller for details on providing an MDM. For more information on the Get Windows 8 Product Activation page, visit the following URL: Microsoft.iso Key Info The Windows 8 ISO (also referred to as a Win7 CD) includes the following files: Win7.iso - This is the original Win7 ISO that has been included on all of the previous Win7 CDs.
