. -fifa-13-automatic/7a056f4c-12a5-4d3f-a4db-00401f25b2c1. . A: First solution I tried to install it again and it said 'Installation failed. The install is failing because the link you posted is from 2015, and the current version for Windows 10 is 2018. It looks like you have a cached version of the original document from 2017 which is failing to install correctly on Windows 10. You can update the link in the cached file, or you can just do a clean install of the program as follows: Open Settings (default settings icon in the taskbar) Choose Update & security Choose Windows Update Choose Check for updates Choose Check for and Download updates After a few seconds it will tell you that there are available updates. You can then manually check for and install the updates. Notes Make sure you don't install the updates that are shown first in the list as it could break your installation These should work on any version of Windows 10, but please don't install updates unless you are 100% sure you want them. This will update Windows to version 1803. Second Solution Activation Dll Load Failed Fifa 13 Ajuda You've got malware or adware on your PC that is causing your PC to act up. It's likely that the malware is the cause of the error message. It's not the fault of the game, it's the fault of the adware. Please don't blame the game for anything. It's not the game's fault. # (C) Copyright 2019 Xilinx, Inc. # # SPDX-License-Identifier: BSD-3-Clause # # The top-level directory name and all component names and subdirectories must # be changed to local values TOP=../.. # The root of HLS distribution include $(TOP)/../hls_common.mk APPS = xcl2 # TARGET should be set to xilinx_example 2d92ce491b
