Movie in Hindi Dubbed. The subject matter of this disclosure is generally related to a system for generating energy for a vehicle. In one example, the system includes an engine and a generator. The generator converts an output of the engine into electrical power, which may be used to charge a battery or

---

other devices that can be used to operate the vehicle. The output of the engine is transmitted to a generator that converts the output of the engine to electrical energy that is used to operate various electric systems within the vehicle. In one example, the generator includes a rotor assembly, which is coupled to

---

the engine through a crankshaft. The crankshaft extends along a vertical axis of the engine, and the rotor assembly is driven by rotation of the crankshaft. The rotor assembly is coaxial with the crankshaft and includes an induction system, which receives air and fuel from an intake manifold of the engine and

---

generates a voltage to drive an  
alternator, which in 2d92ce491b
