You would need to synchronize the file access: var mutex = new Mutex(false, "YourMutexName"); if (!mutex.WaitOne(1000)) { //// just start the process. //// if you need to wait until it

ends, then you need to call mutex.ReleaseMutex() } Synthesis of novel piperazine-hydroxamic acids as multifunctional anticancer agents. Novel series of piperazine-hydroxamic acids, acting as multifunctional anticancer agents were designed, synthesized and evaluated against various cancer cell lines. Some derivatives showed potent antiproliferative effects against human breast cancer MCF-7 and human cervical cancer Hela cell lines in vitro. Further, in MCF-7 and Hela cell lines, the novel compounds showed promising results against MCF-7 cell line by modulating the caspase-3 and -9 activities. The ability of the compounds to inhibit the growth of MCF-7 cells with a higher potency than that of Taxol is suggested. In addition, the newly synthesized compounds also inhibit the proteasome activities. Finally, the compounds were also able
