Category:Application programming interfaces Category:Synchronization Category:Industrial Networking Protocols Category:Industrial EthernetYes The whiplash effect of Brexit has already begun. European business leaders are already lining up for deals with Britain's biggest export industries and, as one senior source told me, some of them are coming in hopes of "earning some brownie points with the Brits" when they visit. "The easiest part for the Germans to do will be in the car industry," a senior source tells me. "The Americans have a lot of work to do to be the Swiss of the EU, and it's clear already that they are not quite there. The Germans want to do business in the UK because the UK is still a place where the average German businessman can go to make money. "All we can do now is to be a friendly, helpful neighbour and look to make a deal that lasts at least five years. We don't want to create any bad feeling between the UK and the EU and we're not going to demand that the UK stay in the EU. We are going to trade with the UK and we are going to attract British companies, and that's going to make sure that British people have jobs and British businesses have customers. The EU has a role in that but it doesn't need to be a punishment role. As a German I'm well used to being a naughty boy in the school yard and I know that it doesn't
