Rate this software We all know that Windows 7 is different from previous Windows versions. In a way it can be said that the development of Windows 7 was a huge "revolution" in the history of Windows. An interface that's more intuitive and more user-friendly. A complete new concept and a completely changed world of Windows (software). One of the main differences of Windows 7, in my opinion, is the way in which basic settings are managed. Microsoft Edge is a modified version of the MS Explorer/Internet Browser. Although is an MS program that does not have anything to do with virus definitions or spyware, is still contains some malicious code within it. The Edge Browser is an element of Microsoft's Windows operating system. It provides a new way for users to access the Internet. Rate this software If you try Microsoft Edge for the first time, you'll see a new concept. Microsoft has made some big changes to their software, and Edge is just one of them. One of the greatest improvements that the Internet Explorer makers have made is to improve the operating system, and this is reflected in Edge. Edge is like Firefox, but it has been customized in a way that has been designed to work together with Windows itself, which makes it very fast and more stable. The interface has been redesigned, with a new touch-friendly interface that adapts perfectly to tablet computers. New features like Windows Hello. Chat gives access to all major networks and messaging applications (Skype, WhatsApp, Messenger, etc.). The development of Edge has been a big revolution in the history of the Internet. Microsoft Edge is a modified version of the MS Explorer, and Edge users will find that the interface has been re-designed in a way that makes it more user friendly. Rate this software If you are a Windows user you'll certainly be using the Internet in some way or another, and Edge is one of the
