AutoCAD files can also be read using a scripting language, AutoLISP. Macros AutoCAD includes a macro editor, which uses a simple text-based file format and is named AutoMAC. It was used for early drafting and is still used to create features in both AutoCAD LT and AutoCAD SE. The first version of AutoMAC was designed to allow for the use of AutoLISP in AutoCAD, so commands were provided in AutoLISP script instead of AutoCAD commands. Layout AutoCAD also includes the ability to import and export to the standard drawing exchange format, DXF. Graphics AutoCAD supports multiple vector and raster graphic formats. These include Adobe Illustrator, DXF, EPS, EMF, GIF, ICO, IFF, JPG, PDF, PICT, PNG, Postscript, PCX, PSD, PPM, PVR, TGA, and WMF. PostScript (PostScript) is a page description language designed to describe the layout and style of a document. PostScript files are page-based and were used to make CAD drawings. A number of drawing applications support the PostScript language, including: VectorWorks, AutoCAD, Drawing, Revit, and Computer-aided manufacturing software. AutoCAD LT requires Windows XP or later, and AutoCAD requires Windows Vista or later. AutoCAD LT, AutoCAD 2010 and AutoCAD 2012 can also convert SVG files into DWG/DXF format. As of AutoCAD 2015, it can also create PDF and BMP files from postscript files. CAD rendering AutoCAD has the ability to export drawing objects (geometric objects) to a number of native raster graphics formats including Bitmap, BMP, EPS, EMF, GIF, JPEG, TIFF, and WMF. There are two rendering engines in AutoCAD: PostScript rendering Autodesk RenderMan RIB file rendering (AutoCAD 2006 and 2007) Rendering technology was also introduced as part of AutoCAD 2008. It allows users to render complex CAD models in real time and allows various views to be rendered using OpenGL. This feature requires the installation of the Autodesk Graphics Application Programming Interface (GAPI). Rendering features also included the ability to create stereo pairs, 5b5f913d15
