What's New In?

The Canvas Photo Store Program (CSPA) is an online service that allows you to organize and upload your digital photos. In order to get the full benefits of using CSPA, you will need to register for a free account. CSPA is a powerful tool for stock, family, and personal photo collection management. CSPA provides you with a simple online tool that enables you to automatically organize your photos into keywords, plus lets you upload the photos to stock sites. You can use CSPA on your computer or any modern web browser. CSPA offers four modes of operation that allow you to control the workflow of your photo management. The four modes of operation include: 1) Viewing, 2) Upload, 3) Export and 4) Import.

- 1) Viewing: You can view any of the keywords you have defined in CSPA as you browse your computer or any web browser. You can also perform other common online activities such as creating tags, moving photos, creating collections, and controlling your license.
- 2) Upload: You can upload new photos to CSPA automatically or from a PC, Mac or other web browser. The uploaded images can be organized into any of the keywords that you have defined. You can also name the photo, add keywords, and then move the photos into folders within CSPA.
- 3) Export: You can export your photos to JPEG, GIF or PNG format. CSPA will automatically export your photos to the most compatible formats for uploading to stock sites.
- 4) Import: You can import new photos from a web browser or FTP server. The imported photos can be grouped into any of the keywords you have created.

In addition to the standard views and features in CSPA, you can add additional keywords to your photos from within your application. CSPA provides a unique way to assign keywords to your photos while you browse your computer or any web browser.

Key Features:

- 1) Organize your photos: CSPA gives you the ability to organize your photos into keywords. You can perform common tasks such as using keywords to name your photos, adding keywords to your photos from within CSPA, and moving photos into specific groups.
- 2) Control how your photos are uploaded: You can use CSPA to upload your photos directly from your computer or from any modern web browser.
- 3) Import photos from the internet: CSPA provides you with an easy method to upload photos directly from the internet. Importing photos from the internet allows you to perform many tasks such as organizing your photos in keywords, naming your photos, and uploading your photos to stock sites.
- 4) Exporting photos to web: CSPA can automatically export your photos to the most compatible format for uploading to stock sites.
- 5) Photo Caching: CSPA provides you with a unique method to cache and store your photos. CSPA caches and stores your photos in a more efficient
