TwinView For AutoCAD TwinView For AutoCAD Video The complete product range from Felix Wueppers, renowned as the World's "Dr. Winkel"; a company with an award-winning history of manufacturing reliable compressed air equipment. As always Felix Wueppers are the number one company in their own segment. This time we are proud to be pioneers in the field of compressed air air-fuel and gas mixers. Our scope ranges from manual units for hobby, professional and industrial use to fully automated, massive production units, all the way to hybrid compressed air air-fuel and gas mixers. The new compressor design is a further evolution of the proven model, but it incorporates a number of important modifications that increase its usability. The output, which is even higher than before, is made possible by increasing the maximum charge flow rate. This concept should particularly address the needs of users with frequent, large cylinder charges. Changing of the charge flow rate is done manually. The handle, with a spring-driven drive, of the charge flow rate regulator is actuated by way of the connecting rod, thus eliminating the need for actuators. The flow-rate regulating function can be switched from function mode to immediate mode by
