Take control of your Facebook, Myspace, MySpace Music, and Netvibes profile! It's very important to me that my programs are super fast and easy to use, but I do enjoy taking the time to test my applications out to make sure that everything works fine. That's why I created BuddyWave. BuddyWave is just like Internet Explorer but built exclusively for Myspace users. (Actually we built it for ourselves - but figured you might enjoy it as

What's New In BuddyWave?

Panties and leather jerkins. Face-covering masks. A bare backside (or two). Not something we were expecting to run across on a

Monday afternoon. But the invitation was real, and we couldn't say no. Get ready for your K-card! read the message, followed by the address for a cast and crew party being thrown by a movierational production company. We weren't sure what to expect, but we knew how to make an entrance. We're here to show the world just how creative you can be on a small budget. And we weren't alone. I've been here for 15 years, and I've never seen this before. Brad was right. Even though the movie industry probably didn't work like this anymore, this place was every bit as creative as it's supposed to be. This is like what I'm hoping to do in the future, says Flash, who'd gone from talking to us in movie lingo to speaking in a

Southern drawl. Im in the entertainment business, and Im going to build a brand for me. And Flash had already done it. The official cast and crew party had been
