

The process of downloading the Android ROM, Stock or Custom ROM, fulfilling the prerequisites, and then installing the same ROM as the official kernel. I use this download and install style but it doesn't work with any of my devices. I've been using this method for a few months now and everything was working fine until I started using Android ROM. Now, when I boot any device and plug it into the USB port, I get a message on the screen that says "Check if the device has a bootable

---

USB drive with root permissions." I can't install the ROM using this method.
