codecs.Unofficial supported freeware MWPlayer is a multi-purpose media player that allows you to render a large variety of audio and video files, thanks to its built-in codecs. The application acts as a frontend for MPlayer and offers several additional functions, such as stream or download YouTube content. Moreover, it allows you to easily chat with other

MWPlayer users. Support for various types of video and audio files MWPlayer can open a large range of multimedia files from local folders, allowing you to create a playlist. You may set the list to repeat once it reaches the last track or render the files randomly. Moreover, the program can open DVD/Blu-ray disc menus or play videos straight from YouTube URLs.

Moreover, it can search and acquire lyrics or subtitles for your video files, then display them on the screen, along with the clips. You have full control over the location of the text, size, font or color. YouTube player and downloader MWPlayer offers you the possibility to play and download content from YouTube, through the open source software SMPlayer and

YouTube Browser for SMPlayer. You may thus browse the website for the desired videos, then play them in MWPlayer's interface. Moreover, you can download and instantly convert the content to the desired type of file and save it to your computer. Alternatively, you may just add the URL to the playlist and play it along with local

KeyMacro is a tool that lets you record and replay keystrokes on your computer. The application allows you to automate actions on your keyboard by recording sequences of keys with different modifier keys (such as Alt, Ctrl and Shift). The tool provides a context-sensitive dialogue for editing all possible keystrokes. You can then use it to, for example, record a series

of mouse clicks. Besides, you can assign macros to hotkeys in order to execute functions quickly. KeyMacro comes with pre-configured macros for you to get started quickly, then you can edit them as required. Support for a wide range of audio and video files KeyMacro supports nearly all the formats that MPlayer can render. It can open a wide range of media files (e.g. AVI, FLV, MP4,

MPEG, MOV, WAV, VOB, ASF, MKV, and MP3) and record them easily. You can easily synchronize the playback with the recording, just by pressing the hotkey you assigned for the Macro. Moreover, you can save the recorded file as an output file in multiple formats (e.g. AVI, FLV, MOV, MP4, MKV, and WMV). You can also search and acquire lyrics or subtitles

for your videos, then display them on the screen. You can also launch the files from the Macros. You just need to open the dialog, type the name of the file and press the hotkey you assigned for the Macro. Download and install KeyMacro: You can download KeyMacro from the software's website (The application offers the free version, which allows you to record two macros and

to assign them to two hotkeys. The paid version is intended for companies that use it in their businesses and allows you to record more macros and to assign them to as many hotkeys as you want. You can also save them to your computer as a project file. AudioVideo Downloader Description: AudioVideo Downloader is a tool that allows you to quickly and easily download all your

favorite audio and video files from YouTube, with just a few clicks of your mouse. The tool enables you to browse YouTube with the mouse while the program downloads and displays all the available content. Besides, you can record and playback the selected audio and video content without any interruption, right from the media player interface. You can

then easily download the 1d6a3396d6

MWPlayer is a multi-purpose media player that allows you to render a large variety of audio and video files, thanks to its built-in codecs.
