
X-force Inventor CAM 2011

Google Glass, or simply Glass, is a brand of smart glasses, a pair of head-mounted optical displays. It was designed by X. If Google Glass becomes a fashion accessory, then we will use the term "Google Glass" as most of us call the Apple iPhone. If not, we will use the term "Google Glass" as most of us call the Apple iPod. You might think that Google Glass is just glasses. They look like regular glasses. But they are much more advanced than just some glasses. Most people don't know what Google Glass really is.
