## RecentX Crack For PC [Latest]

[Download](#)

RecentX is an interesting piece of software that provides access to the recently used files by placing a small sidebar on the screen which stays on top of other windows. It includes a search function and lets you assign tags to spot files easier, among other features.

**Access recent files from a sidebar** This sidebar can be moved to any position on the screen. You can just click a button to expand the list with recently accessed files and view their full path on the disk, open them or visit their location, copy their path to the Clipboard, launch a Command Prompt dialog, as well as rename or remove the files. View recently accessed apps, websites and Clipboard content The files, folders, programs, websites and Clipboard content can be accessed from different tabs in the same manner. It is possible to assign tags with custom names to the selected items, including multiple tags at once. Otherwise, you can create smart tags to show items based on the keywords you specify. A search function is available too. As far as app customization is concerned, you can sort the items in the list by various criteria, select the exact columns to display while leaving out the rest, take into account a longer time period for

---

showing recent items, as well as apply various criteria, such as hiding all files with a specific name. Evaluation and conclusion No error dialogs were shown in our tests, and the program did not hang or crash. It has a good response time and runs on a low amount of CPU and RAM, so it doesn't put a strain on computer performance. Thanks to its intuitive and approachable features, RecentX should please most users looking for a reliable recent files application with bonus tools.

**Installation** Run the install package and accept the license agreement. The program will install the "RecentX" icon in the notification area (system tray) and the RecentX.exe file in the 'Program Files/RecentX' folder. Run the application. You will see a RecentX icon on your system tray. You can move it to a new position using drag and drop. Click on it. On the RecentX window, you will see a list of recently opened files, applications, websites, Clipboard content and system events. You can access the file, folder, app, website and clipboard list from a tabbed window, the sidebar or the search bar. Using RecentX Go to the sidebar, drag the RecentX icon

apply various criteria, such as hiding all files with a specific name. Evaluation and conclusion No error dialogs were shown in our tests, and the program did not hang or crash. It has a good response time and runs on a low amount of CPU and RAM, so it doesn't put a strain on computer performance. RecentX Video Guide There are two ways to add the sidebar on Windows 7. The first method involves placing the file in the Download directory of your PC. Just go to the Start Menu, select the Search option and type "RecentX". The RecentX.exe file will be displayed along with other files and applications. Drag and drop the executable to your desktop, and it will be saved there. Alternatively, you can just use the shortcut to the program which can be downloaded from its official website. After clicking the downloaded file, you are prompted to install it. This process is entirely automatic and is completed in a few seconds. You can drag and drop the shortcut to your desktop and it will be created there. Once the installation is complete, you can launch RecentX from the desktop. You can also add the sidebar on the Windows 10 desktop by opening the Start Menu and typing "RecentX". Just drag and drop the executable to the desktop and you're done. You can launch the program right away. You can
