Immo Universal Decoding 3.2 360

V6 immo universal decoding 3.2.Q: Django: is it possible to use get_context_data to pass data to form? I have search_form.html that contains a search form and I want to pass a user to search form from views.py: def search(request): context_dict = {'user': request.user} return render(request,'search_form.html',context_dict) And in search_form.html, I'm using get_context_data() to get user from context: Search {% csrf_token %} Search 3da54e8ca3
