Macro Magic provides you with unlimited ways to snuff out all of your repetitive tasks by creating macros to perform those tasks for you. Create macros that can do everything you can do, but better, faster, easier, and more reliably! How many of the same things do you do every day with your computer? With Macro Magic you can transform those tasks into a macro. Once created, you can run your macros instantly via HotKeys, MagicKeys, Windows Shortcuts, have your macros respond when certain windows appear, or have them run after your computer has been idle for a specified amount of time. Use Macro Magic's extensive menu driven tool palette to launch and control programs, access and navigate web sites, automate data entry, access all of those buried menu options that you can never remember, and even schedule macros to run unattended using Windows Task Scheduler. With the Macro Builder you can send keystrokes and other input, run programs, rename, copy, move and delete files, wait for windows to appear, run existing macros, maximize and minimize Windows, restart or shutdown your PC, connect to the Internet, access Additionally, Macro Magic introduces options to insert delays, prompt the user to continue macro execution, play sound files on your computer, control existing windows, repeat portions of your macros, create/increment counters, and embed comments within your macro. The Macro Builder allows you to insert steps before existing steps, append steps to the end of the macro, move steps up or down the list, enable/disable any step in the macro with a single mouse click, play the entire macro or just selected portions, pause macro execution, stop macro execution, or import existing macros. Macro Magic's feature rich Macro Builder offers everything you need to create and edit powerful, time-saving macros. This post is brought to you by Software Trust. System Requirements:

Please go here to view the Windows (32 & 64 bit) requirements. If you're not sure what to get, check out this overview. If you get a lot of crashes (see below), consider replacing the card with an NVIDIA GeForce or ATI Radeon. They're cheaper, have similar performance, and usually more stable. The Good Beautiful, well-executed game. Numerous varied and interesting environments. A lot of content. Decent voice acting, albeit nowhere near perfect.
