Here, we will see How to set a default value in an AutoCAD command. This can be very useful if you want to keep a given parameter value across sessions and if you want to provide user's with consistent and user-friendly functionality and experience. Setting a Default Value in an AutoCAD Command 1. First of all you have to create an auxiliary or system command and add your desired parameters. 2. Now create a default value for the command. 3. Finally, give the default value for the command as you want. Let's see an example of a system command for creating a new line. Step 1. Step 2. Step 3. Step 4. Step 5. Step 6. You can set a default value for any parameter like any other command. For example: Step 1. Step 2. Step 3. Step 4. Step 5. Step 6. Here is another example of how to create a default value for a command. Step 1. Step 2. Step 3. Step 4. Step 5. Step 6. Using these steps you can create commands and set a default value for a command. Syntax To set a default value, you have to define the value in square brackets. You can define up to 5 values in one square brackets. You should not define a value if you want the parameter to be a string. If you want to define a value as a number, use a number in the range of 0-9. To define default values for your commands you have to write the parameter name inside the first square brackets. Then you have to define the value in the second square brackets. The following command sets a default value for 'LINE_TYPE' parameter. [LINE_TYPE] 0, 3 If you want to define more than one value for the parameter, you should separate them with commas. [LINE_TYPE] 1, 2, 3 Output The output shows the default value for the parameter. Here, I have defined 1, 2 and 3 as the default values for the parameter LINE_TYPE. 2.3.1.2 Let me explain When you try to open an existing drawing

Fisheries, in many cases, are used as "bait" Both times the U.S. and British performed widespread bombing of Vietnam, the U.S. used carpet bombing and the U.K. used cluster bombs and napalm. Both of these weapons are completely indiscriminate, and Of course, it's not difficult to see how this may not be the case. With carpet bombs, for example, one can only guess at the possibility of dropping a bomb with that might miss its intended target by some large amount. Moreover, the Pentagon has stated on at least two occasions that it would not accept carpet bombing of Vietnam, because the U.S. did not want to fight a total war, and carpet bombing was defined by then-Secretary of Defense Robert McNamara as a "total war" On March 28, 1965, in response to a complaint by President Lyndon Johnson, the Vietnam War Powers Act was passed. The law, which stated that the use of federal troops was limited to situations in which "major hostilities" were occurring, was a specific response to Johnson's belief that the administration of President John F. Kennedy was guilty of "leading the nation into a war in Southeast Asia." Despite this, and despite the fact that Richard Nixon, a former member of the House Armed Services Committee, pointed out that the Congress was only able to outlaw the use of the phrase "total war" by limiting the phrase to Vietnam, by 1966, according to Admiral Daniel Broderick, Nixon complained to the secretary
