Q: Codeigniter select where() IN I have problem with the following \$data = \$this->db->where('id\_plan', \$id\_plan); \$data->select('\*'); \$query = \$this->db->get('prod\_plan'); return \$query->result\_array(); And I have the following table id\_plan name 1 Me 2 You As you see I have a data in database id\_plan 1 2 3 So how to get this result? id\_plan name 1 Me 2 You 3 Me But it returns id\_plan name 2 You 3 Me A: You need to apply the method select\_related() to your query, it will filter out the returned rows by returning the id\_plan value of the related row, so try this: \$query = \$this->db->select\_related('prod\_plan')->get('prod\_plan'); A: Try this: \$data = \$this->db->where('id\_plan', \$id\_plan)->select('\*')->get('prod\_plan');

Q: Will my tree be able to withstand the windy conditions in Borneo? I have a ficus, and if it dies, I will cut it, and will plant a new one. Do you know what kind of tree is the best for the environment in Borneo? A: I don't know what kind of tree you have. Please tell us. My ficus survives (knows to) the windy conditions of the most windy part of the island. There are also small trees in the park in front of the Tree of Life, so I guess ficus is okay. Update:
