also known as the Cashman Covered Bridge, is a historic wooden covered bridge in Oakway, Pennsylvania. It is listed on the National Register of Historic Places.

History Construction on this bridge was completed in 1891, and is believed to be the first covered bridge in the area. The original cost to build the bridge was \$7,000, which was raised to \$10,000 by the time it was finished. The frame of the bridge was built by Edgar W. Arnold. At the time of construction, the route was state-maintained, and a roadbed had been laid. This roadbed was later improved by the state to create a state highway. There are two covered bridges on the original route: the Oakway Covered Bridge (which has a metal roof), and the Sellersville Covered Bridge, which is missing most of its deck and can be
