Graphic Track Maker Full Crack is a utility that allows you to generate new and unique track designs for your slot car races, which will take no longer than a couple of minutes to complete. The program is developed to assist you in coming up with new and intricate layouts and designs that can be used with track positioning and/or slots machines. It offers two different view modes, 'Grid View' and 'Track View', to make the process easier and more efficient. The former shows all the track design sections, the 'Number Of Sections' and 'Angle', along with the 'Radius (To Outer Edge)' and 'Outer

Edge Length' in the form of a table which can be modified to meet your requirements. In 'Track View' mode, you can display the actual layout of the tracks, change their position, zoom in or zoom out using right-clicks and mouse movements. This allows you to estimate if it needs any alterations, which you can only perform from the table in 'Grid View'. Afterwards, you can work with the 'Tools' that Graphic Track Maker offers, like 'Random Search' or 'Sequential Search', which can generate numerous different tracks within seconds. After clicking on the desired track design, you can adjust its

various properties, like 'Remove Duplicates', 'Change Track Width', 'Change Tolerance' or 'Change Colors' (of either the tracks or the center line), in order to customize it to your liking. These track designs are then saved for future use to your computer. Graphic Track Maker Main Features: Highly customizable Track Designs It provides a window that allows you to create various track designs that can be used for slot car races, such as straightaways, turns and other parts, each one being simple to adjust to your personal requirements, while also being customizable in terms of colors

and track dynamics. It also offers you the choice of creating random track designs or sequential (like loop tracks) track designs, which means that the software can offer you with numerous different designs for your slot car races. Highly interactive layout view In 'Grid View', you can view the tracks that are created to screen in a table format, showing 'Section Name', 'Number Of Sections', 'Angle', 'Radius (To Outer Edge)' and 'Outer Edge Length'. You can add more values or update the current ones to meet your requirements. Furthermore
