By using this program you can create catalogs of music, video and other files, add comments, have any kind of file information as well as the path and name of files. Notes on File Grabber: File Grabber not only works with directory files, but with any kind of files. It can save meta-information about the files including the date and name of the file. It can create a list of files by the directory, or by the file name. It can even select files based on any meta-information. The program will automatically select the files needed for you. File Grabber isn't really user friendly, because it's small and simple. It has a lot of features but it may take some time to learn how to use it. Technical Limitations: ❑ Gets to 100 files per directory in each directory. ❑ 10 day trial File Grabber Review: File Grabber is a Windows Explorer plug-in which allows you to save anything you see in the list of files or folders view as a complete set of records. From there, you can edit the data before pasting it into other applications. This plug-in can be used to save the file's name, file path, file comment, file description, file extension, file size, file type, creation date, and other tags of any kind. So, with this plugin, you can save the meta-data of any file. When you have a look at the Windows Explorer, you may observe a nice view where you can easily view and navigate through various items, including files, folders and volumes. But what if you want to save the content of this view? While you can save the contents of a single file or folder, you cannot save the content of a whole view of files or folders. File Grabber is a Windows Explorer plug-in which allows you to do this. File Grabber helps you organize and create any kind of catalog by saving any kind of information about files to your clipboard. In this way, you can create catalogs of files, music, videos, images, and archive or zip disks. File Grabber not only works with directory files, but with any kind of files. A: I actually found the Open Clip File command in the Start -> Accessories -> Windows Explorer menu to be more useful than File Grabber. You can right-click a file in Windows Explorer to open it in Open Clip File. The default behavior of Open Clip File is to save the file to the Windows Clipboard. If you want to save to disk, you have to choose "Add to my documents" from the options. If you simply want to view the file in the Windows Clipboard, you can click the View in Clipboard icon. A: I don't know if there are any other programs that do this same thing but I use this one called File Trek and it does
