Portable SCleaner Portable SCleaner is a tiny and portable freebie designed to tidy up the computer by removing unnecessary files, uninstalling software apps, and shredding files to make them unrecoverable. Wrapped up in a plain and clear interface, the app sports an intuitive set of options that can be tweaked by any type of users, regardless of their previous experience with cleaning and optimization programs. As there is no setup pack involved, you can extract the program files to a custom directory on the hard disk and just click the EXE to run. An alternative is to save Portable SCleaner to a USB drive or other mass storage device to run it on any PC without prior installers. The main application window holds five buttons dedicated to system cleaning, app uninstalling, file wiping, configuration and product information, respectively. The system cleaning components remove web browser traces such as history and cookies, along with temporary Internet files and the Windows page file. Its behavior can be manipulated from the settings are into making Portable SCleaner clean up files automatically on system startup and shutdown. Plus, it can disable Internet Explorer autocomplete as well as take into account an exception list with file types defined by the user. The software uninstallation module loads a list with all identified programs, together with their publisher, version and estimated size. There's nothing special about it really, since its functionality stops after running the default uninstaller (e.g. cannot detect and remove leftover files). Finally, the file shredder is capable of wiping multiple files and directories at once, and lets users drag and drop the items in the window. It supports three deletion methods: normal, overwrite and Gutmann (35 passes, highly secure). Operations are performed quickly in general, while Portable SCleaner uses low CPU and RAM, so its impact on computer performance is minimal. There were no issues throughout our evaluation. However, the utility sports just standard settings and has an outdated interface. Portable SCleaner (formerly Portable Windows System Cleaner) With Registration Code 2022

Portable SCleaner is a free PC tool designed to tidy up your computer by removing unnecessary files, clearing browsing data, and shredding confidential documents to make them unrecoverable. It is extremely small (184KB) and portable (runs on any Windows version that supports WinPE), so it is easy to extract its files to a custom directory on the hard disk to run it on any PC without prior installers. It will clean your system by making the following actions automatically on computer startup and shutdown: - Remove browsing history, autocomplete option, recent documents, temporary internet files, windows page file, and more - Remove recent apps, user and network tray icons, startup/shutdown programs list, autostart programs list, and more - Uninstall programs - Wipe multiple files or folders at once - Shred confidential data Pulse Secure Mobile Security 16.9.0 (3) Portable-PC/SCleaner description: Pulse Secure is a mobile security solution for both Android and iOS platforms. It is available through the app stores and through the web browser. The download includes the browser extension for the Chrome and Firefox browsers, but no standalone application for Windows, so it must be run through the browser. You can extend its protection to your mobile devices by downloading the application directly from the website. However, it is not recommended because the security is not the same as the browser extension and the standalone application. You can use the built-in antivirus system to scan, clean and remove unwanted files and to set up real-time protection if you suspect that your device is under threat. The application includes features such as: - Location services - Browser history - Web browsing - Wi-Fi and Bluetooth connections - History of phone calls - Photos and videos - Information about other installed apps - Silent Mode - Automatic selection of camera apps The app is also equipped with a system cleaner that detects and removes unused files and programs, and removes unwanted registries, services and processes from Windows. The standalone scanner will auto scan for corrupted files, on-the-fly system updates and apps that have been uninstalled, and activate system protection on a regular basis. Symantec Mobile Security for iOS description: This mobile security app for iOS can detect and protect your information when you are connected to the internet. The app offers enhanced security and is equipped with malware and spyware filters, antispam filters and
