A: You have two devices present in your laptop, which are both ACPI\INT3400 (they have the same VendorID and DeviceID, both 0xDABA3FF). Looking up acpi\INT3403 (also having VendorID and DeviceID of 0xDABA3FF) gives a description, which doesn't include a working driver. Looking up acpi\INT3403\SEN1 with the same VendorID and DeviceID tells you that this is a security LED. Looking up acpi\INT3403\SEN2 (which is not part of any DeviceID ) gives you the description of the Password LED (the text of which is at ). Probably all you need 1cb139a0ed
