A CLEAN, NICE, AND UPDATED WORDS DICTIONARY WITH VIDEOS, PHOTOS, AND OVER 1000 ENTRIES What is new in this release: Hi everyone, I have just released a new update of Language Master Italian + Collins dictionary. With this update we present a new version, but unfortunately the update process has been sometimes extremely slow (as it has been for many updates), so I decided to make this update in two "chunks", and this means that you can download the first version and wait patiently for the second one. As always, it consists of 2 parts: 1. The dictionary (it includes the existing dictionary, the new stuff, and the old stuff) 2. The course I hope you'll find this new release useful, and, as usual, I wish you good programming. A CLEAN, NICE, AND UPDATED WORDS DICTIONARY WITH VIDEOS, PHOTOS, AND OVER 1000 ENTRIES What is new in this release: I have just released a new version of Language Master Italian + Collins dictionary. This update contains the following: 1) Translates into Italian. Now it can translate into Italian with the help of several machine translations. Unfortunately the machine translations are not good in some cases, so it sometimes confuses the words. Language Master Italian+Collins does not take over the entire translation process. A translation is never done entirely by the program. It is always complemented by the user who is needed to confirm the translation, and sometimes it is impossible to do so. However, I have done all the essential modifications to make the Machine Translation even better. Now you can manually activate the Machine Translation if you want, and it will "understand" how you want to translate the word. We have also optimized the system that detects and follows Italian texts on the web. I have inserted more verbs into the translation dictionary, such as "fallire", which means "to fail". But the most important change is the fact that we have improved the machine translations. This means that sometimes, when we had to translate a word in Italian, we had to use the machine translation, and sometimes, in order to get the correct translation, we had to use the machine translation (again). I have verified and corrected the translations using all the Italian dictionaries and all the Italian-English dictionaries in Google.
