Keystroke Macro recorder and replay software for Mac and Windows 1) Capture and record keyboard input from any application (incl. Safari, Chrome, Internet Explorer, Flash, QuickTime Player etc.). 2) Playback keystrokes exactly as you recorded them. 3) Trigger macros and record both single and sequential input. 4) Edit and modify macros. 5) Trigger macros on mouse click, drag and drop, windows and menus. 6) Receive macro and input data from the clipboard in a text format. 7) Send input data to the clipboard in a text format. 8) Customize, add and remove shortcuts. 9) Save, rename and delete macros. 10) Verify the format of a keyboard text to the clipboard. 11) In non-Chinese locales, the Windows version needs 8.0+ and the Mac version needs 10.4+ KeyMacro Features: Complete Auto-Save to prevent losing macros due to lack of power, or unexpected software shutdown. Macro Text Formatting - ability to save macros in any text file format including plain text, HTML, RTF, MS Word. Macro Editing - control the text of macros to include changing color, adding to the clipboard, adding to the file name, add a stamp to the text, auto-capitalize, auto-insert, auto-insert-space, autodetect, get/set metadata (author, date, etc.). Recording and Replaying Macros - automatically record macros and replay the input when the trigger event occurs. Macro Operations - including recording on mouse click, drag and drop, and window and menu operations. The MACRO command is also available as the Macro Key combination of your choice, in case the keystroke macro is not working. Macros can be scheduled to run at any time by using a Time-based Trigger or if a specific event occurs (Window Activation, Windows Close, Application Shutdown, Keystroke End). Macros can be paused or stopped at any time. Batch operations are supported. Advanced Replay and Auto-Update - Replay of the most recent recorded macros and automatic replaying of newly recorded macros after a power failure. Replay in the clipboard - copy the text from the clipboard to the text of the recorded macros. Multi-byte keyboard support - check for non-Latin languages to determine whether the recorded keyboard text was actually recorded, or the text the text from the clipboard. Auto-Detect 77a5ca646e

Anti Explorator Crack

Sneaky spyware would do anything to infiltrate your computer, so you need to be extra careful at all times with all content you interact with on the Internet. But this is rarely enough, and periodically scanning your PC and detecting any threats it is exposed to is a natural thing to do. Anti Explorator is a piece of software designed to do just that, being able to find and remove any malware, adware, and keyloggers that could ruin your user experience. Security-oriented tool sporting an intuitive GUI Sporting an elaborate feature set, the program ensures your protection without asking for considerable user input. It features a well-organized GUI that should make navigation a breeze, with the scanner, optional utilities, and the settings section being easily accessible. At first interaction with the program, you may want to carry out a scan in order to identify the looming threat of spyware. There are three different modes you can choose from, namely a quick, full, and advanced scan, depending on the time you want to invest in the process as well as the accuracy of the results. Can remove malware, adware, keyloggers Regardless of your choice, at the end of the operation, a summary is displayed so that you can effortlessly check details on the number of scanned objects, detected files, and the type of action required. Note that, at the end of each scan, a log report is generated so that you can analyze the results anytime. It is also worth mentioning that you can configure the scanner to automatically remove threats, move them to quarantine, handle prioritized locations, and work with exclusions. Aside from the program's main purpose, namely that of helping you get rid of infected files, complementary functionality is provided. To be more specific, the "Utilities" section allows you to access a process monitor, a parental control component as well as an ad-blocker, which should once again enhance your experience while on the computer. Protects you from various threats On an ending note, Anti Explorator should protect you from all sorts of malicious content you may stumble upon on the Internet. The program can scan your PC for malware, adware, and keyloggers, and it does seem to have the know-how when it comes to ease of use or efficiency, so if you are willing to give it a chance, you may be in for a pleasant surprise. Anti Explorator - what's new? It should be noted that
