Why “Doctor Who” Is More Than Just Another Doctor Who Doctor Who (known as the Doctor to its loyal fans) has not only brought the BBC some of its most popular television programs but has also turned the world into one giant science fiction nightmare. From the transformation of man to machine to the introduction of telepathic aliens, this mutant of a man has thrown a wrench into the very fabric of reality. The Whovians are arguably the most dedicated and vocal followers of the show. They fill up the Whovian forums and fan conventions where they eagerly await new information and movies. Maybe it’s because they’re so invested into the show but they really seem to care about it. Dr. Who leads an extraordinary life. He’s been fighting bad guys since 1963 and he’s even had previous lives as Peter Davison, Colin Baker, Sylvester McCoy and Paul McGann. But, in the end, he takes it all back in a rollicking adventure in an extraterrestrial city called Gallifrey. He meets his fellow Time Lords and must fight the Daleks and Cybermen who are trying to take over the universe. The Doctor’s travels have taken him into many interesting worlds and he’s been a thorn in the side of many baddies. Doctor Who fans have a special connection to the character. And what’s even more interesting is that the show is one of the longest running science fiction series in TV history. David Tennant’s Doctor has brought a new sense of quality and intrigue to the show. The show has really changed the course of television. In the past few years, intelligent TV has filled a gap that the other networks couldn’t fill. With Doctor Who and Torchwood, the BBC Television has demonstrated what it really can do in the realm of science fiction. Steve Diggle, writer of The Writer’s Journey, believes that the Doctor has always been a little ahead of his time. During a panel he stated: I love it. I think that’s always a character trait of what he’s done, that he’s pushed the boundaries a little bit. He has always been ahead of his time. This attitude towards science fiction is common in the Doctor’s universe and in the minds of the fans. Can you imagine if The Muppets ever made a film? They would

Q: Android onReceiveListener doesn't always get the message I am implementing a service on a Samsung S3 with Android 4.2.2. This service is registered in the manifest, however the onReceive() method is never called. I have read various sources that say this is a known issue with Android 4.2, but nothing specific to my situation. I have modified the Java source for the service, so I know that it is being registered on the service manager. The code for the onReceive() method follows: `@Override public void onReceive(Context context, Intent intent) { Log.d("MessageReceiver", "Received message"); }` I am using the sample code located here: The service is registered like so: I have a separate broadcast receiver that sends messages to this service, and in my service I can see that the broadcast receiver is actually firing (it sends a message to my service, but onReceive is never called). My question is, why is this service not calling the onReceive() method for the custom broadcast receiver? A: It is an issue in Android 4.2. The solution is to add the service to a list in your receiver. Btw, there are alternative methods to receive messages, for example
