As promised, I'm back with more wallpaper themes for your desktop. With this set, I've created five wallpaper themes based on the movie G.I. Joe: Retaliation. In my case, I've used three of the five to replace the standard Windows 8.1 and Windows 10 logon screen. The themes are listed in the download section. To use the logon screen replacement, select the theme you'd like to use and click "Change Login Screen" to customize the look. Wallpapers: Black – Jungle Movie-inspired Black – City Film-inspired Black – Military Movie-inspired Red – Military Movie-inspired Cyan – Military Movie-inspired Gold – Military Movie-inspired Options: The downloads can be used with all Windows operating systems. I've included six options for each wallpaper. The images in the downloads include the normal, high, and low quality images. Select the standard, high, and low quality image to fit your resolution. Downloads: Use the links below to download all of the wallpapers and the logon screen replacement. One of my favourite thing to do with wallpapers is to combine them, and create a collage. If you're into photography, you can create your own collage with a favourite shot of yours. I've created a simple image collage that you can use as your desktop background. You can use any or all of the photos in the collage, so it's up to you. I've taken the liberty of removing the watermark on the photo to make it a bit easier to use. Enjoy! How to use the image collage: Visit [www.wallpapers-and-wallpaper-downloads.com](http://www.wallpapers-and-wallpaper-downloads.com) and click on "Free Images" in the menu bar. After all, while state breakdowns have indeed become an everyday occurrence in recent years, there's a long history of countries descending into chaos due to one ill-conceived intervention or another. Introduction [sec1] ===== Congenital biliary duct cysts (CBDCs) are rare congenital lesions composed of dilated biliary ducts. Their prevalence is 0.5 to 0.7 per 10,000 autopsies.[B1] Most CBDCs are detected incidentally.[B2],[B3] Ultrasound and computed tomography are the preferred modalities for the preoperative diagnosis of CBDCs. In particular, percutaneous aspiration biopsy is recommended for the definitive diagnosis of CBDCs to avoid unnecessary surgery.[B4] However, CBDCs are rarely mistaken for the primary cystic neoplasms of the liver such as hydatid cyst, intrahepatic cholangiocarcinoma, hepatic abscess, and pseudocyst.[B5],[B6] If a CBDC is not a secondary biliary ductal dilatation, it is not unusual for a CBDC to be misinterpreted as a bile duct lesion or a liver neoplasm. In addition, the lack of typical signs of CBDCs, such as a soft, compressible mass with a muddy appearance, may also confuse the diagnosis of CBDCs. A magnetic resonance imaging (MRI) is used to identify the signal characteristics of CBDCs, which is helpful for differentiating CBDCs from other bile duct and liver cysts.[B7] We herein report a patient with a CBDC with percutaneous biopsy and laparoscopic liver resection. Case Report ===== A 32-year-old woman was referred to our center for further examination and treatment of CBD
