What's New In?

Wmax - is a multi-threading file hosting system. Almost no bandwith is used! There are no download limits or wait-time for files. The server is working on multiple cores and simultaneously on multiple network links. RSS, Newsletter: Browse the website: Users can choose between 3 software versions: 1:wmax 1.3.x 2:wmax 2.x.x 3:wmax 3.x.x Visit the website in to get more information and download the latest version. High Performance File Server From the developer: Small file server and high performance are your things. Ratings Details High Performance File Server is a small and fast file server. It handles many clients simultaneously and its speed is 50% higher than others. It can download up to 48 files at once. These features are useful in network environment with a lot of users and shared files. Unlike other servers, there is no limit on the number of users. Clients can download at the same time without worrying about page waiting or bandwidth. It uses a simple configuration file and you can upgrade it anytime if you want to add new functionality. High Performance File Server - User Guide: Main Features: · 48x the speed of HTTP (only for preview) · Load up to 5 clients at same time · Process 48 files simultaneously · Simple and small configuration · Saves and downloads large files easily · You can decide where to save your files · Support ABS · Support different file extensions like .jpg.txt.avi.mp3.mp4.rar.zip · You can configure all settings in administration section · Bittorent download is offered as well Also you can choose between three easy-to-use versions: Standard version: · Saves and downloads to the default place · Loads one client per time · Pause downloading files and resume them at any time · No uploading limit Pro version: · Loads up to 10 clients at same time · Saves and downloads to another place · Pause and resume the client downloading (after configuring the server correctly) · No uploading limit
