Legislation introduced in the Florida House by Rep. Mike Jacobs, R-Stuart, would bar the city of Florida City and its Lake Trafford land from using eminent domain to take private land for the stadium. The legislation also would provide "enhanced state review" of the project to ensure it comports with local ordinances. The bill is based on a private members bill filed by Jacobs last fall that was aimed at keeping the state from using eminent domain to build a stadium for the Southeastern Conference expansion team at Homestead. The SEC has not been approved as a member of the University Athletic Association, and UAA members are barred from relocating schools that are not football-playing members of the SEC. The all-in-one legislation would not affect the University Athletic Association's plans to build a state-of-the-art football stadium for UF in Orlando or the decision of the Tallahassee-area city of Gainesville to build a new stadium for the Gators. Jacobs said he didn't want local governments to lose control over issues related to a proposed stadium.

### What's New In?

KUninstall is a freeware software which allows you to uninstall software from your hard drive. User Comments Name: Lewis Comment: I use this program in my sys. The uninstall feature is not as good as the other utility i use. it doesn't uninstall registry entries. It gets rid of programs just fine, but when it tries to uninstall registry entries, it starts the uninstall wizard but then closes it off. It doesn't actually delete the entries. Name: SAC Comment: The uninstaller is slow, and only works when no other software applications are running. However, it's fun to watch the uninstall progress and, sometimes, learn something new. I'd give it four stars. Name: Bad-In-Windsor Comment: KUninstall is one of the most useful freeware I've seen. My only complaint is that it's a little slow to load. Other than that, a two-star rating. Name: Romain Comment: KUninstall is pretty cool. It works fine for me (WinXP SP2) and it is the only program I use to uninstall programs from my hard drive. Name: Nate Comment: I use this program to do a quick uninstall from one computer to another, after a clean install. Unfortunately, it seems to have a tendency to try to uninstall a lot of things at once. But that's okay, because it works fine with what I need to do. Name: Bryan Comment: Very fast and easy to use. I needed to uninstall several applications from my laptop. I had to do a clean reinstall from fresh-install of vista because I couldn't uninstall spywarescreensaver.exe. It made an uncompressed backup before installation so I could re-download all the applications without any problems. Name: Ed Comment: I've used this software for years. It does exactly what I need without any problems. I don't use it a lot, but there is no doubt in my mind that it is useful and free.Helping The others Realize The Advantages Of Veg New Music Box Helping The others Realize The Advantages Of Veg New Music Box Anyone, including the homeless,
