## APO USB Autorun Free Download [2022-Latest]

APO USB Autorun is a lightweight Windows tool that launches the autorun.inf file every time a new USB device is connected to your computer, while also providing a quick file browsing system accessible via the System Tray. It may sound a little bit complicated, but APO USB Autorun does an excellent job for users who work with USB devices on a regular basis. The application automatically notified the user when a new USB drive is plugged into the USB port, coming with multiple customization options to delay the startup or customize the autorun file. It places an icon in the Windows System Tray which not only that provides access to all program options, but it also enables you to quickly browse the files of a connected USB drive just by clicking on its name. Although it's supposed to run all the time, APO USB Autorun remains very friendly with hardware resources and it's no surprise given the fact that it's being distributed as a very small package. Plus, it works flawlessly on all Windows versions currently on the market and it doesn't even ask for administrator privileges when launched on Windows 7. All things considered, APO USB Autorun is a handy piece of software that does what it says without hampering system performance in any way. A very good thing is that it's freeware, so it doesn't hurt your pocket should you decide to give it a chance. And last but not least, it provides a fairly quick mode to access the content placed on a USB drive via the System Tray icon.## Copyright 2013 Alex Guelich ## Licensed under the Apache License, Version 2.0 (the "License"); # you may not use this file except in compliance with the License. # You may obtain a copy of the License at ## ## Unless required by applicable law or agreed to in writing, software # distributed under the License is distributed on an "AS IS" BASIS, # WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. # See the License for the specific language governing permissions and # limitations under the License. # Project-wide Gradle settings. # IDE (e.g. Android Studio) users:
