with friends, family or colleagues. Working as a front-end engineer on the development team, I sometimes needed to capture information from the desktop in order to make documentation available on-line. For this reason, I decided to try Joxi out. Though I was not surprised by Joxi's ease of use, I could not but be impressed by the wide range of editing tools it offers. You can quickly customize your screenshot with several tools: select the region of the desktop where you want to place your file, adjust its size, blur out sections or use one of the predefined icons for representing specific kinds of data. After you are done, you can directly share the snapshot to Twitter, Facebook or VKontakte by using dedicated hotkeys. Joxi is a free application, and in order to use it you will need a Google account. Moreover, you can upload video files and audio recordings, edit their duration, and convert them to various formats such as AVI, MPEG, MP3, WMA, OGG, MOV, FLAC, M4A, AAC and WAV.

**Conclusion** If you often have to post information to social media, I strongly suggest that you give Joxi a try. **Description:** L'iPod nano is a portable, pocketable MP3 player. It is most often used for listening to music and watching videos on-the-go. But did you know that the iPod nano has built-in support for annotating your music? It lets you take notes, scribble ideas on it, jot down reminders and even place it aside if you feel that you need a bit more room for the day. Here is how you use it: **Step 1.** Open the Notes app on the iPod nano **Step 2.** Select a note from the list **Step 3.** Highlight and select text in any app on your iPhone to insert it into your note **Step 4.** Press the Home button to return to the iPod nano, then press the Sleep/Wake button to end the note

**Conclusion** The Notes app allows you to write down things on the iPod nano, while the iPhone remains in your pocket. **Description:** Well, I admit, I was a little bit late to the note-taking party, but that doesn't mean that I'm not glad I'm not. Despite that, I still think it's worth your time to get to know that app. So what are you waiting for? Let's start with the process **Before** you can start taking notes, you need to open the Notes app. You can do so
