## What's New In DevRantron?

devRantron is a devRant clone client for the desktop. It's an Electron app and is open source. Features: • Unlimited Rants • Threaded comments • Followers and members • Follows, subscriptions and comments • Queued posts • Downloads linked to Rants and Collabs • 24 hour support via Slack • Tabs for Work and Play (Rants, Collabs, Stories) • Edit Rants and Collabs with a rich text editor • Theme support • Multiple avatar size support • Admin support (Disclosure: I am the lead developer) • Keyboard shortcuts Requirements: • macOS 10.12 or later • Uninstall this application if you have a paid account devRantron is available on NPM and can be found here: To download the latest release version from our website: Release Notes: + Fixed buttons on editor page + Added keyboard shortcuts + Fixed theme/colors selection + Fixed error: "Unable to find the icon file." + Added autoplay: false option for theme control in release v1.0.1 + A number of other bug fixes and stability enhancements ?? This is the best way to connect with the devRant team and help us shape the app. If you have any feature requests, fixes, ideas or general feedback about devRant, please don't hesitate to drop us an email at [email protected] As a developer, you may have heard about devRant, a blooming platform where developers can complain about and connect over their daily issues with comments, memes, up votes and all that social media platter. DevRant doesn't have an official desktop client, and since the platform is fairly new, there aren't that many clients (and good ones, at that) out there. As simple to install as it is to work with This is why you might be interested in knowing a few things about devRantron, an open-source and Electron-based client that brings the devRant platform and its community a bit closer to you, directly on your computer's desktop. That said, download the app, run the installer, launch the application and log-in using your official devRant credentials. Right off the bat, we'll admit that it's not exactly spectacular regarding looks or functionality. However, it does a good job at emulating the devRant's web app functionality with some extra goodies like smart and highly-configurable notifications, for example. Somewhat interesting devRant client that brings the full

---

### System Requirements For DevRantron:

Minimum System Requirements: Minimum System Requirements: OS: Windows XP SP3 Windows XP SP3 CPU: 2GHz with 2Gb RAM 2GHz with 2Gb RAM Disk Space: 2.6 GB (not including .NET files) 2.6 GB (not including .NET files) Graphics: DirectX 9.0 or later DirectX 9.0 or later Sound: DirectX 9.0 or later If you use older versions of Windows, or if you're on an old computer, you may not
