ALL2LAME Free [Mac/Win]

KEYMACRO is a set of advanced macro-functions for Office Microsoft Office Suite. It can record keyboard and mouse inputs, replace numbers or text in the active document, copy data from one application to another. And it's easy to use, users just need to press a hotkey combination and press a button in the program interface, the macro will be automatically done. KeyMacro can record mouse clicks and commands on the screen. It can also record mouse clicks and keyboard events and replace the content of various Microsoft Office applications: Word, Excel, PowerPoint and Access. It has 3 modes: "Normal", "Speed" and "Record". "Speed" mode enables you to set a speed limit for the whole macro operation, which is useful when you need to set the time for the macro to complete, when the "Record" mode is selected, KeyMacro will ask you to type some text, and automatically create a macro based on your text. The "Normal" mode is most useful, because you can create a macro as simply as you can. All functions of KeyMacro are easy to use, for example: you can record a mouse click, drag a file to a destination and more. If you have any questions, please free to ask at License: KeyMacro - single application: for one computer: 2.50$; for one computer with every update: 2.90$; for one computer, with every update, plus internet connection and updated KeyMacro web: 7.90$; for one computer, with every update, plus internet connection and updated KeyMacro web Plus: 12.90$; KeyMacro - for 10 computers: 50.00$; for 10 computers with every update: 57.50$; for 10 computers, with every update, plus internet connection and updated KeyMacro web: 150.00$; for 10 computers, with every update, plus internet connection and updated KeyMacro web Plus: 260.00$; KeyMacro - for 100 computers: 400.00$; for 100 computers with every update: 450.00$; for 100 computers, with every update, plus internet connection and updated KeyMacro web: 1250.00$; for 100 computers, with every update, plus internet connection and updated KeyMacro web Plus: 2750.00$; KeyMacro - for 1000 computers: 4000.00$; for 1000 1d6a3396d6

ALL2LAME is a graphical user interface for LAME MP3 Encoder, and enables users to easily encode their audio tracks to MP3 files, as well as add or edit ID3 tags. The advantages of portability The installation process can be bypassed altogether, as this product is portable. As a consequence, you should know that the Windows registry is not going to be affected in a way without your approval. Another important aspect is that you can run it on any PC you come across with ease, by simply moving the program files to a USB thumb drive. File extensions you can use This tool supports a pretty wide range of formats at import, such as WAV, MP3, OGG, AAC, MP4, MPC, FLAC, APE and WV, and it enables you to upload them with the help of a file browser, as well as the "drag and drop" function. Modify tags, add album separators and select switches The encoding and decoding process can be started with just a click of the button, while you can also add ID3 tags or set up the application to automatically detect filename scheme and copy tags from source files. It is also possible to create a gapless encoding and add album separators with ease, select switches from a drop-down menu and select the output directory. A last evaluation ALL2LAME is not going to put a strain on the computer's performance, as it requires an insignificant amount of resources in order to work properly. The response time is good, the interface is user-friendly and we did not come by any errors or hangs. All in all, it is safe to say that this tool is reliable and efficient, and a good choice for all types of users that are interested in converting some of their audio files to MP3s.
