Queen's University BelfastQ:
multiline text box for file select I

have seen similar questions answered on SO, but I have not found the question. How would you add a multiline text box to the File Dialog in Microsoft Visual Studio for the .NET platform? I would like the user to be able to write text in the text box and then press enter to select the file, like the text box below in the Microsoft Windows Image Acquisition application. A: The file dialog is indeed natively written for Windows but it's

similar to the file dialog box of Mac. You can use the file picker component to achieve your requirement. The following code is taken from the wiki.

```
public class MyFileChooser : Form {  
private void  
InitializeComponent() { //  
MyFileChooser created by a  
designer and stored in a file.  
this.fsFilePicker = 9df0af710a
```
