This will make sure you will not lose your bookmarks and other important data. Before you do this, make sure you do not have any third-party applications installed on your computer. Close all programs and windows on your computer. Go to the Start menu Right-click on Computer Select Manage Select Indexing Options Check the box Uncheck "Indexing Service" Click on OK

System Requirements:

As noted above, The Matrix is very restrictive on hardware requirements, with an emphasis on using PC hardware that is the absolute minimum for a basic computer to handle. It is also rather temperamental on different computers, having glitches here and there. If you have an older computer with limited memory or a slow processor, it is best to wait until we have a version that is optimized for your computer. With that said, The Matrix is tested and should work on a wide variety of computers and operating systems (Mac, Linux, Windows). We have tested it on everything from top of
