If it's a raw image, then click on the image in the Photo View. If it's a jpeg image, then open it in a new window. Load your image: On the File menu click Open. Browse to your image and select Open. You can also drag and drop the image from your desktop to the window. Turn on the Create a new file option: On the file menu, click on Selection, Options, Create a new document and Selectable for the Other Option. A window will appear. Click on the down arrow next to the Create new document and select Browse to find your image. Select the type of file (jpeg/raw) and press OK. Select the image you want to work with and press OK. Go to File > Open. Create a new layer: On the Layers palette, click New and press Enter (Windows) or Return (Mac). It will open the New Layer dialog. Select your image. If you are using raw images, make sure that the RGB option is selected. Drag the new layer to the canvas: Now you have a new layer over the image.
