Fifa 22 For PC (April-2022)

FIFA (or FIFA for short) is the most popular football series in the world. It was officially named the most popular sports video game of all time by Guinness World Records, and has over 95 million registered players. FIFA is developed by EA Canada, the same team that brought the acclaimed 'Heroes' series to life. EA Canada puts a focus on creating authentic gameplay, and the FIFA series is no exception. The game is one of the deepest sports titles in the world, with the same depth as real-life football. Players can enjoy real-time player physics, crowds, ball control, tactics and player attributes. FIFA has also been recognized as the best-reviewed sports game of all time by numerous sources, including GameSpot, GameSpy, IGN, Joystiq, Official Xbox Magazine, News.com, PCWorld, Prefix, and many more. How is FIFA a huge success? We asked Michael Murray, the Director of Operations for EA Sports, about the popularity of FIFA in the following interview. "There's a few things that come into play. We have millions of people playing FIFA online, our mobile products and social products, as well as tens of thousands of hardcore players playing on Xbox Live or the PlayStation Network. The big one is the millions of 'casual' players playing the game. These are people who just play on weekends, maybe at lunch breaks, or in the evening. They don't have a ton of time to play, but they want to. They're not starting from scratch, so to speak. They've played a ton of games over the years, but they want to play it now. Also, they get into a game for half an hour and feel they're able to enjoy a whole new game experience, and that game experience is FIFA. This is especially true for casual audiences who really enjoy the heart of FIFA. We have people who've been playing for years, and the game really keeps changing and growing every year. The gameplay of today is very different compared to five years ago, and FIFA keeps getting better." What makes FIFA such an attractive title to play? With all the highly detailed human-like physics in the game, the ability to control the ball and play with your friends, and fun, engaging and realistic gameplay, it's no wonder that FIFA is bc9d6d6daa
