Q: Batch file to start a batch and then execute another I want to call a batch file from another, and then execute that other batch file. In the following script I want the "RunMe" to run, and then I want the "PrintLine" to run after it. @echo off cd C:\Users\mauser\Desktop\CME\MarkdownEdit\build\x64\Debug C:\Users\mauser\Desktop\CME\MarkdownEdit\MarkdownEdit.exe @ECHO on How would I go about doing this? A: Start a new batch file say and call your batch file as @echo off start "RunMe" "%~dp0MarkdownEdit.exe" call "PrintLine" A: Why don't you have the

second batch file just return? for /f "tokens=*" %%i in ('dir /b /od *.bat') do (%%%i) goto :EOF A: If you really need to start another batch file, you have to get the output of the first batch file. Try this...

```
@echo off
::Start program
call "C:\Program Files (x86)\My Company\My Product\bin\debug\MarkdownEdit.exe"
::Get the return code
set /P errorCode=
::Do something with errorCode...
echo %errorCode%
::End program
exit /b %errorCode%
```

to a dilation, mucosal tear or disruption during endoscopic snare resection. Fourth, inadvertent mucosal lesions caused by the snare may lead to unnecessary biopsies and treatments.\[[@ref16][@ref17]\]

Surgical resection is another method of treatment for superficial colorectal lesions. After local excision of these lesions, the tumor margins should be examined histologically to rule out cancer or confirm negative margins.\[[@ref18]\] When a positive margin is found, additional resection should be performed until a negative margin is achieved. Other treatment options, such as endoscopic mucosal resection (EMR), endoscopic submucosal dissection (ESD), and surgery, can be tried after a confirmation of cancer-free margins.\[[

Featured list of the Best Mining Apps you can Download for Android on the Smartphone. Are you planning to start your own Mining Operation? We have the Best Mining Apps for Android including resources and links for mining on smartphones! There is such a thing as too much of a good thing. This is especially true when it comes to cryptocurrency mining. If you are an early adopter of cryptocurrency, you may end up with a hashrate of a couple of TH/s. The result? You're throttled for days, weeks, or even months. That's not a problem when you're just starting out. On the other hand, if you're an experienced miner, you'll want to be able to unleash your full hashrate as

quickly as possible. What does it take to get your mining rig to the top of the heap? It's actually quite simple. And we're going to show you how to do it today. Best Mining Apps for Android With the vast majority of the mining apps in this list, you get a ton of features for free. That's not the case with Webmineral. As you might expect, you can use it for free, but you won't get the comprehensive set of features that it offers. However, Webmineral has its upsides. In particular, the tutorial section is quite comprehensive, covering topics such as: Starting the web server, how to generate a private/public keypair Getting your app up and running, in no time at all Using

Socks5 with Webmineral Using proxies And more! After you've installed Webmineral, it's important to understand that there are two completely separate programs here: Webmineral Webmineral has everything you need to get your web-based mining started, including: A miner An administration interface A settings manager That said, here's a breakdown of what you get in Webmineral: Features : Webmineral provides a web interface that lets you manage your cryptocurrencies, as well as webminer and other software. Webmineral can do everything you're used to doing with the regular miner. However, you'll be restricted to using

your GPU for mining, rather than CPU or GPU. That doesn't
