THE STRAIGHTFORWARD PASS THAT PUTS THE SPARK IN FUTURE PLAY In addition to reworking balls, player identities and ball physics, FIFA 22 introduces HyperMotion technology, which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power gameplay. We've reworked the physics to more realistically and elegantly recreate the behaviour of a spinning ball, like a rugby ball. This means balls become more unpredictable and less predictable as they roll across the pitch, making every pass unique and risky.

STUNNING TECHNOLOGY FOR THE MOST INCREDIBLE TECHNOLOGY-PACKED FOOTBALL EXPERIENCE In addition to FIFA's industry-leading gameplay systems, FIFA 22 introduces a number of features to bring the pitch to life like never before, with Player Traits – play a way that's specifically tailored for that player's skill set, such as dribbling or shooting or corner kicks – and new Team Creation and Team Style. Team Creation allows you to share the brand ethos of your club, creating a completely unique look to help you stand out and feel like you're

representing your favorite team. Team Style, meanwhile, allows you to customise your team to suit your style of play, with four different kits to choose from, including clash styles. FIFA 25 Player Ratings In FIFA 22

FIFA is a football video game series published by Electronic Arts. The series is a popular annual title for the PlayStation and the Xbox. The first game was released in September of 1992, and the latest title released is FIFA 19. The series features licensed teams from all over the world and the gameplay was designed to be similar to Association football. FIFA is the game that started

it all. FIFA is the series that started it all. Originally released in September of 1992 on the SNES, the first ever game has proven to be a classic, and is still played today. The first game featured licensed teams from all over the world, as well as the first scoring system (you could score by shooting the ball into the net, getting it onto the crossbar, or by picking up the ball in the final third of the pitch). Remember when ⚽ was just a thing ⚽? ? #FIFA19 | pic.twitter.com/fVOJmmQi3g — EA SPORTS FIFA (@EASPORTSFIFA) February 5, 2019 One of the things I'm most proud of at Electronic Arts are our teams of developers that are constantly putting the gameplay first in every game. So many games come out, and we see what the gameplay is like, but we don't see how it translates on the pitch, until we play it ourselves. I saw this at FIFA, and I saw it with FIFA 19. The gameplay was so different, I thought it was unbelievable. With FIFA 20 and FIFA 19, we made it a goal to change the game every year so it was fresh, and to make sure the gameplay was what I had seen. This means we really did put the gameplay first, and it's why we get asked every year, 'What has FIFA done since FIFA 16?' because we really want to be the best game out there.
