1. Field of the Invention The present invention relates to a zoom lens and an image pickup apparatus having the same. In particular, the invention relates to a zoom lens suitable for use in an image pickup apparatus such as a video camera, a digital still camera, a silver-salt camera, a broadcasting camera, and a monitoring camera, and an image pickup apparatus having the same. 2. Description of the Related Art There are known various types of video cameras. For example, there is known an image pickup apparatus in which two to three zoom lenses are arranged in order from a first lens to a third lens. Moreover, there is known an image pickup apparatus in which two zoom lenses are arranged in order from a first lens to a third lens and a zoom lens is further arranged in order from the second lens to the third lens. Japanese Patent Laid-Open No. 5-321517 proposes a zoom lens in which a first lens unit is of a fixed-focus type and the first lens unit is moved to effect zooming. Japanese Patent Laid-Open No. 5-321517 proposes a zoom lens in which the first lens unit is divided into two or more lens units. Japanese Patent Laid-Open No. 9-3981 proposes a zoom lens using a second lens unit. On the other hand, there are proposed various constructions of compact zoom lenses (optical systems) having high zoom ratios, in particular, of six to seven. However, a high zoom ratio has increased the number of lenses, so that it has been difficult to reduce the overall length of the zoom lens while maintaining a high zoom ratio. Generally, in an optical system having a high zoom ratio, a lens unit close to an object side is moved for effecting zooming, and a lens unit close to an image side is moved to compensate for image degradation during zooming. According to the construction disclosed in Japanese Patent Laid-Open No. 5-321517, the first lens unit is divided into two or more lens units. Thus, the first lens unit is moved not only for effecting zooming but also for compensating for image degradation during zooming. Thus, it has been difficult to reduce the overall length of the zoom lens. According to the construction disclosed in Japanese Patent Laid-Open No. 9-3981, the second lens unit is used for effecting zooming. Q: Search data from sql database through php I am searching data from sql database through php in a form that I made, the fields are: ID, NAME, EMAIL, CONTACT_NUMBER, TELEPHONE, MOBILE_PHONE and BIRTHDAY the ID is auto increment, NAME, EMAIL and CONTACT are the text fields and the rest are the date fields The problem is when I search the data from the database I get the result in the form of: Key : 0 for the NAME, EMAIL and CONTACT_NUMBER and in the form of: Key : 1 Key : 0 Key : 0 for the MOBILE_PHONE and BIRTHDAY How can I fix it so that in the search result I get all the data in one row? or do you have any solution to this problem? Thanks A: The problem is that you have text fields that are larger than the default length of the database field. If you create your text fields with the display length blank, it will result in the text being truncated and appear as Key : 0 Former "Lost" writers Damon Lindelof and Carlton Cuse are looking to make a video game out of Apple's hit show "Westworld". The Game of Thrones and Lost-inspired HBO drama series is now in its second season and has been a huge hit for the network, which has seen its viewership increase steadily each week. The second season is more of a continuation of the story rather than a direct sequel to the first. Casting is still pending, but the pair are looking to secure the film rights before the second season is complete. A successful game could help fans to revisit the story of the park and the human hosts when the series is all wrapped up. Previous video game adaptations have fared extremely poorly. The popular title Grand Theft Auto was based on the critically acclaimed film, but the game was a commercial failure. Games based on other successful films such as Harry Potter, Guardians of the Galaxy, and Kingsman also haven't fared well, with critics deriding them as unimaginative, expensive, or poorly written. The pair's involvement with the series would be a welcome boost for the film's prospects. The two have been at the forefront of the revival of
