"We spent months designing the HyperMotion technology that's most authentic to the game," said John S. Hollenhorst, Lead Designer at EA SPORTS. "The result is an experience that feels fresh for those that haven't played Fifa 19 and provides new approaches for those that have." The technology applies physics to on-field actions, and could provide a look at a new feature in Fifa 22 Full Crack. When the player reaches the ball, their controller instinctively follows the exact movement of the ball. It could be a new aim assist feature, or a completely different way to interact with the ball. The movement will also be super-charged for players with specific physical characteristics, and could reveal new ways to play. Here's a video demonstrating the technology. © Copyright 2020 Eidos. All rights reserved. The grass is greener on the other side, sure. We're a couple of years into a new generation of gaming hardware and here we are with the latest in controller innovation. And we don't just mean the Creative Assembly games. We mean FIFA. Fresh from the E3 announcements this morning, here we have. As you'd expect, the new EA Sports title is getting the benefit of the company's new motion tracking tech, based on Real Player motion capture data. It's being billed as "the most authentic sports sim on the planet", but how does it actually look in the flesh? Head to head with the previous, and it's a bit like playing on a different, more responsive and infinitely easier to control pitch. But it's also very different. First up, the running. Our new hero has been upgraded. Previously, he was dour and ambling, and he's gone for an instant sprint at the press of a button. It's a pretty big difference in-game, but the sheer... sprint! is a lot easier to control. After all, a button is only as good as its trainer. We're not done with features, either. Also added is new crosshair, which adjusts to the pitch's curves. A control option will also be present to enable the player to switch between pitch black and pitch white. You'll be able to see yourself in the ref's eyes, and if you're careful you can tell when refs are about to send you

Football Manager lives and dies by its gameplay. Team strategies, formations and tactics are second nature to those who've been into the game for years, but newcomers need to find their feet. And as any football manager will tell you, you're only as good as your players. So what kind of game is FIFA? Well, we think it's a game that really doesn't hold back on giving you the tools you need to build a winning team. Not only that, but you can take the lead in every direction – from tactics to scouting reports to breaking news stories. We've built the FIFA World Ballpark to replicate the true atmosphere of the pitch. We know that features like TV replays and detailed crowd interactions are important to fans of the game, so we've made sure that they're the main focus of the experience. The ability to earn Player Stories as your club grows is enhanced with new story elements that will be shared across television and social networks. Additionally, commentary from the likes of David Scutt and Gary Neville will bring the game closer to life than ever before. A brand-new user interface re-invents the FIFA ball to make goalkeepers a lot more intuitive and defenders much easier to lock down on the ball. FIFA also offers the most accurate and detailed representation of player running styles ever seen in a football video game. We've even included a goalkeeper action replay, allowing goalies to recreate their saves for years to come. The Career Mode has also had an overhaul – from the creation of an ideal XI from which to work, to the implementation of a more realistic transfer system. Fantasy managers will enjoy the new enhanced feature, which allows you to create your own personalised team from scratch. There's even a brand-new mode called MyClub, which allows you to create your very own virtual Premier League club where you can take the reins of the management of one of the real-world Premier League teams. Full Season mode lets you control your club through a full season, while Quick Match also offers the full flexibility of game match conditions, including half-time changes and key injuries that impact on your team. And who knows what might happen during a new season of gameplay innovations in FIFA? Only by playing and discovering new things will you find out, as you take your club's next steps together. FIFA is built
