Featuring many of the same gameplay features introduced in previous iterations, FIFA delivers a completely new approach to its game modes, with key enhancements across Ultimate Team, Career, and Online Seasons. * Enhanced FIFA Ultimate Team – FUT continues to be the most popular mode for players, as well as the main driver for the most hours played within the overall franchise. This year, FUT introduces updated card acquisition and more depth to its card collection system, as well as the ability to edit

cards right on your phone, giving players more freedom and customization than ever before. * Career Mode - Players can now play multiple games in the same calendar year of Career Mode, allowing them to have more choice in how they progress throughout the season. The mode features an improved SkillBoost mechanic and real-time planning, with a more realistic impact on players' ability to perform at their best. In addition, a season-long general performance report now provides a clear overview of a player's performance throughout the year and highlights areas in need of improvement. * Online Seasons - FIFA continues to be the only sport-simulation title to offer a league structure for the online community. Players can compete for a spot in the end of year-end Champions League and earn global rankings based on their results. * New broadcast

camera views – Thanks to new camera views, players will now be able to see a greater range of the action from the broadcast booth, while getting a closer look at players and the crowd. This year’s cameras bring the Premier League and Barclays Premier League matches even closer to how broadcasters do live broadcasts, such as the Man City-Man United game in the Barclays Premier League, the Crystal Palace-Liverpool game in the FA Cup, and Manchester United’s game at Old Trafford.
