Wadja Mobile Editor

Wadja Mobile Editor is a total web publishing system for mobile phones (or PDAs). Wadja Mobile Editor allows you to work in a simple and easy way and give free space in you mobile to upload your work and publish it in the web. Visit the Wadja Software homepage at: Wadja.com is also the web site of a Spanish company (Wadja SA). A new release of weblog/wadja this month include new display options, a faster editor, enhanced image uploading and editing options. The latest update also introduces new ways to make your website available from any device at any time. Screen Resolutions: The new display options are designed for devices with various screen resolutions. Screen resolutions are the specific pixel dimensions. Screen resolutions can be either widescreen, 16:9, 8:9 or square. Screen dimensions are calculated based on the display resolution so that your website looks great on any device regardless of the screen resolution. Usability: We know that having a mobile site that looks good is not always enough to draw your visitors. You want to be able to reach your visitors on any device from a web browser. That's why we've made it easy for you to make your website accessible at any time. Whenever you want your mobile website to be available, simply upload your website and it will be ready to use. With this version you can also upload your files from a USB Stick. ImgEditor: Another key improvement for the ImgEditor is the uploading and editing of thumbnails. You can now upload a high resolution thumbnail and have it automatically converted into a smaller thumbnail. This frees up the space on your mobile for you to add more content. Enhanced Editing: The editing functions of the ImgEditor have also been enhanced. You can now select additional effects in your pictures before uploading them. You can also resize images by dragging the corner of the image. When you edit thumbnails, you can now define an expiration time so that thumbnails don't pile up on your mobile. See the new options when you edit a picture: To find out more see the on line documentation available at: Overall, this website is very good. It looks nice, well built and fast. It also has good style and a lot of

What's New In?
