Check out our blog for more information about the latest build: Â .Effects of chronic nocturnal hypoxemia on ventilatory response to CO<sub>2</sub> in the Mongolian gerbil. The effects of chronic nocturnal hypoxemia (10.8 +/- 0.4% oxygen) on the ventilatory response to CO<sub>2</sub> in the Mongolian gerbil were examined. In these studies, the animals were maintained in a respiratory chamber for 21 days with normal ventilation before, during, and for 3 h after hypoxic exposure. If animals were kept in room air during the pretreatment, CO<sub>2</sub> sensitivity (P<sub>0.1</sub>) was markedly reduced from 24.8 +/- 4.4 to 10.0 +/- 0.4 ml.kg<sup>-1</sup>.min<sup>-1</sup>, but CO<sub>2</sub> sensitivity returned to normal within 3 h of recovery. In contrast, if animals were exposed to hypoxia and recovered in room air, P<sub>0.1</sub> was significantly reduced from 20.0 +/- 3.3 to 13.0 +/- 0.6 ml.kg<sup>-1</sup>.min<sup>-1</sup>, and remained depressed for up to 3 h after recovery. During the stable period of the study and recovery the arterial blood gases were well-maintained without any evidence of acute respiratory acidosis. These results demonstrate that nocturnal hypoxemia impairs the ventilatory response to CO<sub>2</sub> in the Mongolian gerbil, and the response is preserved and even enhanced if exposure to hypoxia can be terminated after adaptation.

Ramel Fahoum Ramel Fahoum (born Ramel Eid, ), is a Qatari football midfielder for Al-Wakrah. He previously played for Qatar SC and Al Sadd SC.
