Having looked at player intelligence, a key-feature introduced in Madden NFL 19, we will have a closer look at the improvements made to attributes that control every aspect of football from player skills to presentation. This edition focuses on the following five topics: Player Attribute Review, Accuracy Improvements, Skill Improvements, Passing Improvements, and Presentation Improvements. Our team has put in a lot of thought into each topic and we've made some serious changes and improvements.

Player Attribute Review The player attributes have been reworked since the game began development. This new iteration was used to help bring down the overall values of the attributes, as well as to change the gameplay flow of each attribute. The result? FIFA 22 is an intense, real-game experience that blurs the line between what's real and what's not. There is a considerable difference in game speed and pace in FIFA 22 as compared to the previous game, Madden NFL 19. In the past, a ball carrier would slow down as they approached the hole or zone and then accelerate as they sprint. With the new player attributes, this is no longer the case and a more realistic game is played. You can see the difference in the two player attributes videos below. These are taken from the Madden NFL 19 and FIFA 21 concepts.

Accuracy Improvements Players are more accurate than ever before and with every player

attribute, the difference in accuracy is visible. We've completely reworked each player's footwork, which includes everything from the way you prepare for a pass to the way you recover from a tackle. And the detail that went into each of these changes is so great that we believe that the fine details that make these changes are evident to even the most casual player. We've also implemented reactive footwork, which means players can react to incoming passes quickly and accurately, allowing them to play on the move. We are pleased with the feedback that we have been receiving from players: This mechanism has helped the team get closer to the living, breathing players that you can find on the pitch. Passing Improvements In FIFA 21, when a player placed a pass, one of the main goals was to bring the players closer to the ball. This allowed the players to feel more complete and connected to their teammates. This is still the case in FIFA 22. The player attributes now

What's new:

- **Tackle decision-making has been enhanced with new AI that reacts and adapts to real-life situations, offering more options for future skilled play. For example, when receiving a through ball, a player is able to choose whether to use his/her momentum to shoot from distance; turn in a more dangerous direction; be more static and create a situation where he/she can make a better option.**
- **FIFA Ultimate Team is also available through Xbox Game Pass.**
- **Smoothed touch controls, ball physics and visual improvements increase the player experience throughout the game.**
- **New Game Vision* is a new camera system that interprets the rules of the game in a view that is more natural and less repetitive.**
- **HyperMotion Technology is also available for In-Game Ad-Hoc together with game offers.**
- **A new worldwide visualisation of the MatchDay details on the Spotlight screen, with information on all 22 players and the referee, plus individual attributes and contracts.**
- **Off-ball movements for all 11 players in the Tactical Free-Kick area, with different control animations depending on**

-
- the distances from the ball.
- **FIFA 22 introduces an updated right analogue stick system with a new wrapping system that allows faster, more natural turning.**
 - **'Tackling Parade' is a new Exhale concept built into the right Stick, which offers players more control. When controlling your defensive style, it allows you to slow down and 'parade' the ball in front of players to confuse them.**
 - **The new Defending Midfielder concept allows for more options to break down deep defences. Players can have more options and more variety in their tactical approach to the game without forcing them to adapt the rest of their team.**
 - **Quick Likes feedback is now integrated into the mouse and triggers, so you don't have to be within the game and pause to like a goal.**

EA SPORTS FIFA delivers a deep and authentic soccer experience that allows fans to play the game the way the pros play, both on and off the field. An all-new control scheme gives players the power to dribble, pass and shoot with unprecedented control. New dribble moves like the 360° Turn and Quick Turn allow players to both control and deceive opponents. Timing is everything for players and the new Breathing System adds even more depth to player control. EA SPORTS FIFA introduces Free Kicks, where players can reset an attack by kicking the ball directly at a player, and Deflect off the first touch, which gives players the ability to turn a

defender into a scoring opportunity. It's all part of a new and more physical approach to the game. In Season modes, up to 18 players can play against a single CPU player, and Free Kicks are introduced to the Attack, Defence and Overtime modes. In the upcoming 12-Player Online Seasons mode, your performances will be tracked against other teams. And FIFA's all-new Franchise mode lets players create a pro player and manage their career. For the first time, players can assign real-world training sessions to focus on specific areas of the game. And you can gain Coaching experience to master the art of the position. There's plenty to do on and off the field in FIFA. The new Career Mode takes fans deeper into the life of a professional soccer player than ever before. A dedicated Manager gives you the opportunity to play as a team, complete with realistic clubs, player contracts, and a hierarchy system that allows players to advance throughout their careers based on performance, game time, and other factors. A new Fan Relations system is also included to help fuel the excitement at matches and raise awareness of the sport. Unlock the Ultimate Team Ultimate Team is a new card-based online mode that puts up to 72 players in a single match and offers up to 12 player slots in a single Ultimate Team. Create your own custom squad by combining players from other EA

SPORTS FIFA clubs in your region. Choose from the best Ultimate Team card sets featuring the latest in-game players, real-world players, and card-inspired FIFA Legends. Player Impact Narrow down every game with more control over the pitch through Player Impact. New AI routines are designed to give players the ball, simulate reactions, and make the most of opportunities. Skills are now contextual and reactive, meaning players can best use their skills depending
