Importing images into Photoshop To get your files onto the computer, you need the appropriate software for both pictures and videos. The default software you use for videos is the software that came with your camera. For images, your default software for photos is the Canon Image Capture program for your Canon digital camera. You also have many other choices — in fact, software can be overwhelming. We discuss file types in much more detail later in this chapter. For now, we'll stick with the basics and show you how to import an image into Photoshop. When importing images, it is sometimes best to print your images off the screen so that you can crop them to your desired composition. To import a picture, follow these steps: 1. \*\*Open the image in the photo program that you use. (In some programs, you can right-click the image, choose Edit→Copy and then paste it into Photoshop. Other programs may use a menu command similar to Edit→Paste.)\*\* 2. \*\*If you have a quick way to import the file, use it. If not, follow these instructions. If you have a large image file, you may want to reduce its size so that it loads more quickly into Photoshop. 2. \*\*Navigate to the file that you want to import in the Photoshop window on your computer.\*\* 3. \*\*If you want to import all files in the selected folder, click Browse and then navigate to the folder containing the files.\*\* You may instead click Open or Navigate to open the file. 4. \*\*If you want to import a specific file, double-click it or select it from the window that appears.\*\* You may also click Open or Navigate to select a single file from a folder. 5. \*\*Click Open.\*\* The imported file appears in the Files window and is listed in the Layers panel. 6. \*\*Click the Layers button in the Layers panel, and the image fills the active canvas.\*\* 7. \*\*To make sure that the image loads into the empty canvas, drag the image to its desired position.\*\* If you drag it outside the canvas, you may be tempted to drag to a

Odor detection and discrimination in younger and older adults. Odor identification and discrimination in younger and older adults. J. Exp. Psychol.: General, 136, 291-300, 2002. Researchers have long demonstrated age differences in olfactory perception. Although there is accumulating evidence that such differences are linked to cognitive development, the extent to which they reflect differential access to information or differences in olfactory perception and memory is less clear. In this study, which was conducted to a large degree offline, younger and older adults were asked to indicate the presence or absence of seven human body odors in different proportions. The results suggest that, in addition to differences in memory capacity between groups, differences in encoding and/or maintenance of odor-related information may be responsible for differences in odor perception.Q: how to get fixed image width and height in jquery using css class? I want to get the fixed width and height of an image inside a div using jquery. The idea is to make some sort of a layout as shown in the image below: ...and the code snippet is as shown in the image below .example { width: 250px; height: 150px; background: pink; } .box { width: 200px; height: 150px; background: pink; } \$(document).ready(function(){ var imgwidth = \$("#image").width(); var imgheight = \$("#image").height(); var divwidth = \$(".example").width(); var divheight = \$(".example").height(); if(divwidth > imgwidth)
