This allows for a more authentic, natural in-game experience. The player's style of play can be changed with the press of a button, and this will alter his physical movements, ball skills and passing manner. The player can also actively influence how he is perceived by the computer-controlled opponent and enemies – e.g. by using a high work rate, or a counterattacking style. More importantly, this gives the player direct feedback as to what their coach would want them to work on to improve their game. Chris says: "With HyperMotion Technology, we have taken the fans' request to build the ultimate player into the game, and in the process, we have developed some pretty cool new features. With this technology, we are able to change player styles and perception within the match, and in turn, alter the way the game is played. So, I always say the best league is the one where you are the only player on your team and the coach is not. "It's hard to find any more difficult and exciting league than the new version of FIFA. As always, we want the game to be played the way you would in real life, and this is achieved by the way the players move. The new features really bring life to the game, and I think that is what will keep players of all ages enjoying the experience." Inspired by the latest kit trends and player specs from the game's player models, new aspects of the game also include new shirt types, ball physics, ball movement and the way players deal with the ball. The return of dribbling from last year's FIFA has been tweaked, and the game has now also introduced the ability to run at the ball, pressuring or picking off opponents. New ball physics also mean you can play differently and, as a result, receive more accurate feedback, while the way players deal with the ball has been vastly improved. New kit trends The new additions to FIFA's kit trends include the popular club strip from AC Milan, who are led by coach Clarence Seedorf. This kit uses a design that represents the lion's mane and makes it look like it's woven into the fabric. New white shirts The new kits available for download for the first time on Xbox One and PlayStation 4 have a fresh, crisp look and feel

## **Features Key:**

- Live out your dreams as both a manager and a player in FIFA 22. Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory.
- Or test your skills as a player, with a more immersive Player Career mode that gives you more ways to progress, achieve, and immerse yourself in your Pro's journey through the game.
- FIFA 22 introduces "HyperMotion Technology" – a revolutionary new technology that recreates the kind of high-intensity, continuous movements seen in the real-life game. Comprehensively capture and analyse every movement of the players' bodies and apply it into video game.

FIFA is the world's most popular sports video game franchise. More than 100 million people play FIFA games each year, and the "Official Footwear of FIFA" on Xbox and PlayStation has won more than 11 awards since its launch in October 2007. FIFA is the only sports video game series to have received the prestigious Sports Game of the Year at the Game Developer's Conference, which is an annual award presented to the game that best creates and sustains a compelling sports gaming experience. FIFA has also been awarded the Best Sports Game franchise and Sports Game of the Year in each of the past three years by the Academy of Interactive Arts & Sciences. The game is co-published by Electronic Arts Inc. (NASDAQ: EA) and the video game publishing unit of media company The Walt Disney Company (NYSE: DIS) with more than \$1 billion in annual retail sales and is available on the Xbox 360, PlayStation 3, Wii, PC and Nintendo DS, as well as mobile phones, tablet devices, the Apple iTunes Store and a variety of other online outlets. What is Power of Football? Power of Football is the graphic engine that drives all aspects of the game across all platforms, including the cutting-edge FIFA Interactive World Cup™, FIFA Interactive World Tour and FIFA Ultimate Team modes. Power of Football includes a variety of advanced, dedicated GPU processing, shader-based animation and GPU-accelerated texture mapping features that bring the world of FIFA into ultra-high definition with stunning lifelike graphics and fluid real-world speed and rendering. What are the game modes and features in FIFA Ultimate Team? FIFA Ultimate Team lets players build a team from over 30,000 real football players' name, image, and attributes across two eras in the UEFA competitions, including the UEFA Champions League, UEFA Europa League and UEFA Super Cup. Along with the timeless feel of current professional football, Ultimate Team also boasts two new periods in its history—the famous clubs of the Premier League era including past winners of the UEFA Champions League and clubs that have been crowned La Liga, Serie A, Bundesliga and others—and the Club World Championship era. Players can take part in games through a streamlined player management interface with intuitive tools to construct the best possible team. Ultimate Team is based on a draft-and-build format, which relies on the intelligence of EA's football-aware artificial intelligence (AI) engine, Socceronomics™, to put together the perfect team
