Q: Combine two object fields in a single field by properties Lets say i have two object properties, that just hold the same value that are for example the ID. In this case, I want to combine them into a single field. I figured it would be best to just remove the duplication, but I can't do that at the moment as I'm unable to. var obj1 = { obj1_prop_id: 1, obj1_prop_name: 'test' }; var obj2 = { obj2_prop_id: 2, obj2_prop_name: 'test' }; console.log(obj1 + obj2); The desired result would be for obj3 to hold the following: { obj3_prop_id: 1, obj3_prop_name: 'test' }; To create such a prop would be stupid, so I'm just hoping there's a clever way to do that. Thank you! A: The cleanest solution I can think of is to iterate over the properties and create an object with all the desired values from both properties. You may want to create another object to store the merged values. var obj1 = { obj1_prop_id: 1, obj1_prop_name: 'test' }; var obj2 = { obj2_prop_id: 2, obj2_prop_name: 'test' }; var merged = {}; for (var key in obj1) { if (!key in obj2) { merged[key] = obj1[key]; continue; } merged[key] = obj1[key] + obj2[key]; } console.log(merged); Ladyboy Dating Sites Ghana Mother Superior – Dolly Mizvahira.
