Protect your private information - Guaranteed. Acronis® Secure Erase is a foolproof tool to permanently delete files on your computer - a step that traditional software cannot do. Secure Erase uses new high performance algorithms that permanently erase files by overwriting data or applying highly advanced methods of data shredding. Unlike traditional software, Secure Erase deletes all files and folders on the partition where the files/folders are located and not only on the Recycle Bin. So you can permanently delete files from hard disk partitions where not even the Windows Search application can find them. Secure Erase is an advanced File Shredder that produces high level of confidence that your data will never be recovered. Get rid of any data you do not want to share with anyone.   So, what else can Secure Erase do? The following list presents a few of the key features of the Secure Erase program: High performance algorithm: The Secure Erase algorithm is optimized for speed and accuracy when

shredding. All Microsoft® Windows® operating systems supported by the Secure Erase software are fully compatible. The use of Secure Erase is completely free of charge, no registration, no additional costs or restrictions. This, in turn, increases the program's efficiency and speed. The program completely shreds a file by overwriting the data that is contained in that file and does not actually delete the file. It does this in order to secure all content for recovery with the risk of data recovery. If the data that is contained in the file is undamaged, it will be able to be reconstructed by experienced forensics experts. Secure data storage and remote wipe: You can store your shredding files at the Secure data Storage, on remote servers or send them to other devices. The Secure Eraser Wizard available at the Secure Erase Online solution offers advanced shredding functions that you can install at any time. This can be done, for example, if the same SD card is used for storing digital data. Spyware filtering: In today's world, the ability to quickly and efficiently protect the information you want to be invisible from prying eyes has become more important than ever. Secure Erase can automatically adjust to block and exclude Spyware programs, saving you time and complexity. Deleting files does not filter Spyware programs and other malware. Spyware programs are removed from Secure Erase with the constant use b7e8fdf5c8
