"This year, when we called them, we had two or three players that were going to turn pro," [University of California head coach] Mike Montgomery said. "I think that they have a big year next year. They're going to make the jump." The Wolverines' top-ranked recruiting class has received a big boost. Edmonds (Victoria, British Columbia) has committed to attend the University of Michigan. The 6-2 guard from St. James School in The Dalles, Ore., picked the Wolverines over previously committed schools such as the University of Minnesota, Michigan State University, Stanford University, Washington, and Duke. He's ranked among the top prospects in Canada. Edmonds is expected to be in Ann Arbor in early August. "He's one of the best players in Canada," Montgomery said. "I see him being a guy that eventually could be a really good pro." The details of Edmonds' commitment to Michigan emerged Saturday after the Wolverines defeated Minnesota 57-46 in the Big Ten tournament final. Earlier in the day, Michigan sophomore guard Ronnie Johnson had turned down an offer from Wisconsin-Green Bay and also committed to go to Michigan. Johnson, from Regina, Saskatchewan, is ranked No. 10 by Rivals.com. The 6-3 guard from St. Michael's College School in Toronto, Ontario, is known for his prolific scoring ability. Saturday's victory at the Metrodome was the 16th state title for coach Gary Leonardi at Minnesota. Minnesota (18-14) matched a school record with 18 victories. Edmonds is also committed to play with Warren (Mich.) Roscommon Catholic's Zach Harrison at Warren. Harrison, a 6-2 shooting guard, is ranked No. 54 in North America by Rivals.com. Edmonds averaged 23.9 points, 11.6 rebounds and 4.0 assists this season.

Comments One of the many things I love about these guys is their ability to switch things up from one show to the next. For an album with 15 songs, there's a wide spectrum of tempos, genres, beat styles, and instruments. It's clever, addictive, and creative. This kinda makes you wish they dropped a sophomore in the second half of the year instead of this, frankly. They have had several proper albums since No Cities To Love, but I would say they never took a proper album as being significant to them.

The use of metallophilic interactions to tune the separation behaviour of peptide macrocycles. The effect of peptide macrocycles incorporating a thioether linker, [C12[SSSS1-NHSNHSNHSNHS]]-[C6H12], 2, were investigated for the separation of beta-sheet peptides from random coil peptides. We show that peptide macrocycles can behave like metal catalysts and their separation efficiency can be tuned by the addition of simple metal salts./* * Copyright (C) 2013 salesforce.com, inc. *
